CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR THE CARBON PAINTED ON THE CRT, AFTER REMOVAL OF THE ANODE CAP.

WARNING !!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE WORK TO AVOID POSSIBLE SHOCK HAZARD DUE TO LIVE CHASSIS. THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE POWER LINE.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARKED Δ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE Δ SUR LES SCHÉMAS DE PRINCIPE, LES VUES EXPLOSÉES ET LES LISTES DE PIÈCES SONT D'UNE IMPORTANCE CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT. NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÉRO DE PIÈCE EST INDIQUÉ DANS LE PRÉSENT MANUEL OU DANS DES SUPPLÉMENTS PUBLIÉS PAR SONY.

CAUTION

Lead Free Soldered Boards

The circuit boards listed below [Table 1] used in these models may have been processed using Lead Free Solder. The boards are identified by the LF logo located close to the board designation e.g. F1, H1 etc [see examples]. The servicing of these boards requires special precautions to be taken as outlined below.

example 1

example 2

Table 1

Board	Function
A	Audio, Deflection, Tuner, Regulators, Interface
B	Backend, Scanrate, LVDS, A. Interface
C	R.G.B Out
D	Deflection
F1	Power Switch/Fuse/SIRCS/Standby LED
G	Power Supply
H1	Front AV Input/Headphone and Control Switches
J	AV Scart I/O Switching and Sockets
VM	Velocity Modulation

It is strongly recommended to use Lead Free Solder material in order to guarantee optimal quality of new solder joints. Lead Free Solder is available under the following part numbers :

Partnumber	Diameter	Remarks
7-640-005-19	0.3mm	0.25Kg
7-640-005-20	0.4mm	0.50Kg
7-640-005-21	0.5mm	0.50Kg
7-640-005-22	0.6mm	0.25Kg
7-640-005-23	0.8mm	1.00Kg
7-640-005-24	1.0mm	1.00Kg
7-640-005-25	1.2mm	1.00Kg
7-640-005-26	1.6mm	1.00Kg

Due to the higher melting point of Lead Free Solder the soldering iron tip temperature needs to be set to 370 degrees centigrade. This requires soldering equipment capable of accurate temperature control coupled with a good heat recovery characteristics.

For more information on the use of Lead Free Solder, please refer to <http://www.sony-training.com>

AE-6BAD/Y SELF DIAGNOSTIC SOFTWARE

The identification of errors within the AE-6BAD/Y chassis is triggered in one of two ways :- 1: Busy or 2: Device failure to respond to IIC. In the event of one of these situations arising the software will first try to release the bus if busy (Failure to do so will report with a continuous flashing LED) and then communicate with each device in turn to establish if a device is faulty. If a device is found to be faulty the relevant device number will be displayed through the LED (Series of flashes which must be counted) See table 1, non fatal errors are reported using this method. Each time the software detects an error it is stored within the NVM. See Table 2.

Table 1

Error Message	LED Code
No error	00
Reserved	01
OCP (Over Current Protection)	02
Over Voltage Protection	03
No Vertical Sync	04
IKR Error at power on	05

How to enter into Table 2

1. Turn on the main power switch of the TV set.
2. Program Remote Commander for Operation in Service Mode. [See Page 21].
3. Press 'AUX/VIDEO' 'AUX/VIDEO' > 'MENU' on the Remote Commander.
4. Using the Remote Commander, Scroll to the 'Error' item using the down arrow key, then press the right arrow key.
5. The following table will be displayed indicating the error count.

Table 2

Error monitor

Note: To clear the error count data press '80' on the Remote commander.

The operating instructions mentioned here are partial abstracts from the 'Operating Instruction Manual'. The page numbers of the 'Operating Instruction Manual' remain as in the manual.

Switching On the TV and Automatically Tuning

- ① The first time you switch on your TV, a sequence of menu screens appear on the TV enabling you to: 1) choose the language of the menu screen 2) Choose the country in which you are going to operate the TV. 3) adjust the picture slant, 4) check how to connect optional equipment to your TV, 5) search and store all available channels (TV Broadcast) and 6) change the order in which the channels (TV Broadcast) appear on the screen. However, if you need to change any of these settings at a later date, you can do that by selecting the appropriate option in the  (Set Up menu) or by pressing the Auto Start Up Button  on the TV set.

- 1 Connect the TV plug to the mains socket (220-240V AC, 50Hz). The first time that the TV set is connected, it is usually turned on. If the TV is off, press the  on/off button on the TV set to turn on the TV. The first time you switch on the TV, a Language menu displays automatically on the TV screen.

- 2 Press the , ,  or  buttons on the remote control to select your language, then press the OK button to confirm your selection. From now on all the menus will appear in your chosen language.

- 3 The Country menu appears automatically. Press the  or  button to select the country in which you are using the TV. Press the OK button to confirm your selection.

- ① If the country in which you want to use the TV set does not appear in the list, select "off" instead of a country. To avoid wrong teletext characters for Cyrillic languages we recommend selecting Russia country if your own country does not appear in the list.

- 4 Because of the earth's magnetism, the picture might slant. The Picture Rotation menu allows you to correct the picture slant if it is necessary.

- a) If it is not necessary, press OK to select Not necessary.
b) If it is necessary, press  or  to select Adjust now, then press OK and correct any slant of the picture between -5 and +5 by pressing  or . Finally press OK to store.

- 5 A diagram will appear showing you how to connect a wide range of equipment to your TV set. Follow the instructions and finally press the OK button to remove the picture and continue the automatic process.

- ⚠ After the automatic tuning process has finished and the optional equipment has been connected at this stage, we recommend you follow the instructions explained on the section "Connection Guide" on page 15 to get the optimum settings related with the optional equipment.

- 6 The Auto Tuning menu appears on the screen. Press the OK button to select Yes.

- 7 The TV starts to automatically search and store all available broadcast channels for you.

- ⚠ This procedure could take some minutes. Please be patient and do not press any buttons, otherwise automatic tuning will not be completed.

- ① In some countries the TV Broadcaster installs the channels automatically (ACI system). In this case, the TV Broadcaster sends a menu in which you can select your city by pressing the  or  button and OK to store the channels.

- ⚠ If no channels were found during the auto tune process, a message appears automatically on the screen asking you to connect the aerial. Check the aerial connection (refer to page 7). Press the OK button to restart the auto tuning process.

- 8 After all available channels are captured and stored, the Programme Sorting menu automatically appears on the screen enabling you to change the order in which the channels are stored.

- a) If you wish to keep the broadcast channels in the tuned order, go to step 9.

- b) If you wish to store the channels in a different order:

- 1 Press the  or  button to select the programme number with the channel (TV Broadcast) you wish to move. Press the  button.
- 2 Press the  or  button to select the new programme number position for your selected channel (TV Broadcast). Press the OK button to store.
- 3 Repeat steps b)1 and b)2 if you wish to change the order of the other channels.

- 9 Press the MENU button to remove the menu from the screen

 Your TV is now ready for use

continued...

Introducing and Using the Menu System

- 1** Your TV uses an On-Screen menu system to guide you through the operations. Use the following buttons on the Remote Control to operate the menu system:

1 To switch on the menu screens:

Press the MENU button to switch the first level menu on.

2 To navigate through the menus:

- To highlight and select the desired menu or option, press \blacktriangle or \blacktriangledown .
- To enter the selected menu or option, press OK or \rightarrow .
- To return to the last menu or option, press OK or \leftarrow .
- To alter the settings of your selected option, press \blacktriangle / \blacktriangledown / \rightarrow or \leftarrow .
- To confirm and store your selection, press OK.

3 To switch off the menu screens:

Press the MENU button to remove the menu from the screen.

The Picture Adjustment Menu

- 1** The "Picture Adjustment" menu allows you to alter the picture settings.

To do this:
Press the MENU button and then press OK to enter this menu. Next press \blacktriangle or \blacktriangledown to select the desired option and press OK. Finally read below how to operate into each option.

Picture Mode This option allows you to customise the Picture Mode based on the programme you are watching. After selecting this option press OK. Next press repeatedly \blacktriangle or \blacktriangledown to select:

Personal (for individual settings).

Live (for live broadcast programmes, DVD and Digital Set Top Box receivers).

Movie (for films).

Once you have selected your desired option, press OK to store.

- 1** "Brightness", "Colour" and "Sharpness" level of "Live" and "Movie" mode are fixed on the factory to get the best picture quality.

Contrast Press \blacktriangle or \blacktriangledown to reduce or enhance picture contrast. Next press OK to store.

Brightness Press \blacktriangle or \blacktriangledown to darken or brighten the picture. Next press OK to store.

 This option only appears and only can be altered if "Picture Mode" is set to "Personal".

Colour Press \blacktriangle or \blacktriangledown to decrease or to increase color intensity. Next press OK to store.

 This option only appears and only can be altered if "Picture Mode" is set to "Personal".

Hue Press \blacktriangle or \blacktriangledown to decrease or to increase the green tones. Next press OK to store.

 This option only appears for NTSC signal (e.g. USA video tapes).

Sharpness Press \blacktriangle or \blacktriangledown to soften or to sharpen the picture. Next press OK to store.

 This option only appears and only can be altered if "Picture Mode" is set to "Personal".

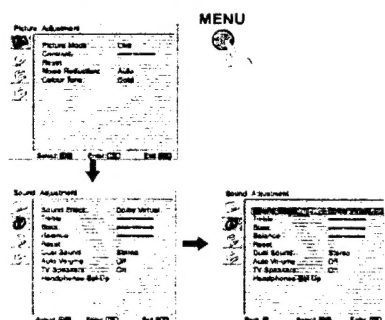

Reset Press OK to reset the picture to the factory preset levels.

Noise Reduction This option is set to Auto to automatically reduce the snowy picture visible in the broadcast signal. However, it can be modified by pressing \blacktriangle or \blacktriangledown to select Off, Low, Mid or High. Finally press OK to store.

Colour Tone This option allows you to alter the tint of the picture. After selecting this option press \blacktriangle . Next press repeatedly \blacktriangle or \blacktriangledown to select: Warm (gives the white colours a red tint), Normal (gives the white colours a neutral tint), Cold (gives the white colours a blue tint). Next press OK to store.

The Sound Adjustment Menu

i The "Sound Adjustment" menu allows you to alter the sound settings.

To do this:
Press the MENU button and press \downarrow to select D , then press OK to enter this menu. Next press \downarrow or \uparrow to select the desired option and press OK. Finally read below how to operate into each option.

Sound Effect	This option allows you to customise the Sound Effect. After selecting this option press OK. Next press repeatedly \downarrow or \uparrow to select: Off (Flat response). Natural (Enhances clarity, detail and presence of sound by using "BBE High Definition Sound system"*). Dynamic ("BBE High Definition Sound system"*) intensifies clarity and presence of sound for better intelligibility and musical realism). Dolby** (Dolby Virtual, simulates the sound effect of "Dolby Surround Pro Logic"). Once you have selected your desired option, press OK to store.
Treble	Press \downarrow or \uparrow to decrease higher-frequency sounds. Next press OK to store.
Bass	Press \downarrow or \uparrow to decrease or to increase the lower-frequency sounds. Next press OK to store.
Balance	Press \downarrow or \uparrow to emphasise the left or the right speaker. Next press OK to store.
Reset	Press OK to reset the sound to the factory preset levels. Next press OK to store.
Dual Sound	<ul style="list-style-type: none"> For a Stereo broadcast: Press \downarrow or \uparrow to select Stereo or Mono. Next press OK to store. For a bilingual broadcast: Press \downarrow or \uparrow to select Mono (for mono channel if available), A (for channel 1) or B (for channel 2). Next press OK to store.

Auto Volume Press \downarrow or \uparrow to select On (the volume level of the channels will stay the same, independent of the broadcast signal, e.g. in the case of advertisements) or Off (the volume level changes according to the broadcast signal). Next press OK to store.

A If you select "Dolby Virtual" on the "Sound Effect" option, the "Auto Volume" option will automatically be switched to "Off" and vice versa.

TV Speakers This option allows you to select if you want to listen the TV from the TV speakers or from an external amplifier connected to the audio outputs on the rear of the TV.

After selecting this option, press OK. Next press repeatedly \downarrow or \uparrow to select:

- On** (to listen the TV from the TV set speakers).
- One time off** (to listen to the TV from the external amplifier only one time. By using this option, any time the TV is turned off/on, it returns to the default setting "On").
- Permanent off** (to always listen to the TV from external amplifier).

Once you have selected your desired option, press OK to store.

i If you have selected "One time off" or "Permanent off", the volume of the external equipment can also be altered by pressing the \triangle +/- buttons of the remote control. When the volume buttons are pressed, the symbol \otimes will appear indicating that the volume you are altering is not the volume of the TV set speakers, it is from the external equipment.

Headphones Set Up	This option allows you to customise the headphones volume and the PAP settings (refer to page 19 for details on PAP). After selecting this option press OK. Next press repeatedly \downarrow or \uparrow to select: volume Press \downarrow or \uparrow to decrease or increase the volume level from the headphones. Dual Sound <ul style="list-style-type: none"> For a Stereo broadcast: Press \downarrow or \uparrow to select Stereo or Mono For a bilingual broadcast: Press \downarrow or \uparrow to select mono (for mono channel if available), A (for channel 1) or B (for channel 2). PAP Sound Select Frame if you want to listen to the active screen (framed) of the PAP screen (see page 19), select Left picture if you want to listen to the left screen or select Right picture if you want to listen to the right screen.
--------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

i * The "BBE High Definition Sound system" is manufactured by Sony Corporation under license from BBE Sound, Inc. It is covered by U.S. Patent No. 4,638,258 and No. 4,482,866. The word "BBE" and BBE Symbol are trademarks of BBE Sound, Inc.

** This TV has been designed to create surround sound effect by simulating the sound of four speakers with two speakers, when the broadcast audio signal is Dolby Surround encoded. The sound effect can also be improved by connecting a suitable external amplifier (for details refer to page 27).

** Manufactured under license from Dolby Laboratories. "Dolby" and the double-D symbol DD are trademarks of Dolby Laboratories.

PAP (PICTURE AND PICTURE)

i PAP divides the screen into two to watch two pictures in format 4:3 simultaneously.

Switching PAP on and off

1 Press **□** to display PAP.

i One of the screens will be framed to indicate that this is the active screen. It means that when you want to select the PAP source, you will be doing it in the active screen.

2 Press **□** again to remove PAP.

i On the screen appears a banner guiding you how to operate PAP. This banner will disappear after some seconds but it always can be displayed again by pressing the **⏏** button.

Changing the active screen

A This is only possible if Media Selector is set to TV.

To change the active screen (framed), press the **◀** or **▶** buttons.

Selecting PAP source

1 Selecting a TV channel:

Press the **▶** button to select the left screen as the active screen. Next press the number buttons or **PROG +/-** to select a TV channel.

A Video input signals can not be displayed on the left screen.

2 Selecting an input source:

Press the **▶** button to select the right screen as the active screen. Next press repeatedly the **⏏** button to watch the input signal of a connected equipment onto the TV right screen. For more details on which input symbol you want to choose, please see section "Viewing pictures from equipment connected to the TV" on page 27.

A RF signal (TV broadcast channels) can not be displayed on the right screen.

Selecting the sound

The sound of the active screen (framed) always comes from the TV set loudspeakers. Besides that, you can listen to the active screen as well as the non active screen via headphones.

To do this:

With the PAP switched on, refer to the section "The Sound Adjustment Menu", select "Headphones Set Up" and set the option "PAP Sound" according your preference. For details see page 13.

Teletext

i Teletext is an information service transmitted by most TV stations. The index page of the teletext service (usually page 100) gives you information on how to use the service. To operate teletext, use the remote control buttons as indicated below.

A Teletext errors may occur if you use a channel (TV Broadcast) with a weak signal

To switch on Teletext :

1 Select the broadcast channel which carries the teletext service you wish to view.

2 Press the **⏏** button one time to enter Picture and Text (P&T) mode. The screen is divided into two with the Text display on the left and the TV channel in the right corner.

3 If you wish to view the Text in full screen mode, press the **⏏** button a second time.

To select a Teletext page:

Input 3 digits for the page number, using the numbered buttons.

If you make a mistake, retype the correct page number.

If the counter on the screen continues searching, it is because the page is not available. If this is the case, input another page number.

To access the next or preceding page:

Press **PROG + (⏏)** or **PROG - (⏏)**.

To freeze a teletext page:

Press **⏏/⏏**. Press it again to cancel the freeze.

To reveal concealed information (e.g: answer to a quiz):

Press **⏏/⏏**. Press it again to conceal the information.

To select a sub page:

A teletext page may consist of several sub pages. In this case, one or more arrows appear next to the page number and an information box is displayed at the bottom of the screen showing the number of sub pages contained on this page. As soon as sub pages are available, they start to automatically run. If you want to stop the show and select your desired sub page, press repeatedly **▶** or **◀**.

To Switch Off Teletext:

Press **□**.

Fastext

i Fastext service lets you access Teletext pages with one button push.

When you are in Teletext mode and Fastext is broadcast, a colour coded menu appears at the bottom of the teletext page. Press the appropriate coloured button (red, green, yellow or blue) to access the page corresponding to your menu choice.

Remote Control Configuration for VCR or DVD

1 In its default condition this remote control will operate the basic functions of this Sony TV, Sony DVDs and most Sony VCRs. To control VCRs and DVDs of other manufacturers (and some Sony VCR models), the remote control needs to be configured.

fig. 2

To do this:

- 1** Before you start, look up the 3 digit code for your brand of DVD or VCR from the list below. On those brands that have more than one code, enter the first code number.
- Sony will endeavour to update the software according to market changes. Therefore, please refer to code table included with the remote control for latest code set.
- A small label is added inside the battery door to allow you to record your brand codes.

1 Press and hold the button of the remote control for approximately 6 seconds until the green DVD and VCR light of the Media Selector starts flashing (see fig. 1).

2 While the VCR and DVD lights are flashing, enter all three digits of the code for your brand of VCR or DVD (see the list below) using the number buttons on the remote control (see fig. 2).

1 If your selected code is entered correctly, the green light VCR or DVD (according to your selection) will be lit momentarily (see fig. 3), otherwise repeat all the above steps.

3 Turn on your VCR or DVD and check that the main functions work.

- 1** If your device is not working or some of the functions do not work please check that you entered the correct code set or try the next code listed against the brand.
- Not all brands are covered and not all models of every brand may be covered.

4 Always remember to press the or button until the green light illuminates according to the equipment you want to operate with this remote control: VCR, TV or DVD. Refer to pages 28 - 29 on how to operate the AUX mode.

VCR Brand List		DVD Brand List

Technical Specifications

TV system:
Depending on your country
selection:
B/G/H, D/K, L, I

Colour system:
PAL
SECAM, NTSC 3.58, 4.43 (only
Video In)

Channel Coverage:
VHF: E2-E12
UHF: E21-E69
CATV: S1-S20
HYPER: S21-S41
D/K: R1-R12, R21-R69

Picture Tube:
Flat Display FD Trinitron WIDE:
32" (approx. 82 cm. measured
diagonally)

Rear Terminals

- AV1
 1/ 1
21-pin scart connector
(CENELEC standard)
including audio/video input,
RGB input, TV audio/video
output.
- AV2
 2/ 2
21-pin Scart connector
(CENELEC standard)
including audio / video input,
RGB input, monitor audio/video
output.
- AV3
 3/ 3
21-pin Scart connector
(CENELEC standard)
including audio / video input,
S video input,
selectable audio / video output
and SmartLink interface.
- audio outputs (Left/Right)
- phono jacks
- Front Terminals
- 4 S Video input - 4 pin
DIN
- 4 video input - phono jack
- 4 audio input - phono
jacks
- headphones jack
- "Memory Stick" Slot

Sound Output:
2 x 20 W (music power)
2 x 10 W (RMS)
Woofer:
30 W (music power)
15 W (RMS)

Power Consumption:
135 W

Standby Power Consumption:
0.5 W

Dimensions (w x h x d) :
approx. 910 x 586 x 586 mm.

Weight:
approx. 64 Kg.

Accessories supplied:
• 1 Remote Control (RM-942)
• 2 Batteries (IEC designated,
AA size)

Other features:
• 100 Hz picture, Digital Plus.
• Teletext, Fastext, TOPtext.
• NextTVview.
• SmartLink.
• TV system autodetection.
• Dolby Virtual.
• BBE Digital.
• NICAM.
• PAP.
• ACI (Auto Channel
Installation).
• "Memory Stick" (reader).
• Auto Format.

Optional accessories:
• Stand especially designed for this
TV (SU-32FQ3).

Design and specifications are subject to change without notice.

This instruction manual has been printed on:
Ecological Paper - Totally Chlorine Free

Troubleshooting

 Here are some simple solutions to problems which may affect the picture and sound.

Problem	Solution
No picture (screen is dark) and no sound.	<ul style="list-style-type: none"> • Check the aerial connection. • Plug the TV in and press the  button on the front of the TV. • If the standby indicator  is on, press TV I/O button on the remote control.
Poor or no picture (screen is dark), but good sound.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to the factory settings (see page 11).
No picture or no menu information from equipment connected to the Scart connector.	<ul style="list-style-type: none"> • Check that the optional equipment is on and press the  button repeatedly on the remote control until the correct input symbol is displayed on the screen (see page 27).
Good picture, no sound.	<ul style="list-style-type: none"> • Press the  + button on the remote control. • Check that "TV Speakers" is "On" in the "Sound Adjustment" menu (see page 13). • Check that headphones are not connected.
No colour on colour programmes.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to factory settings (see page 11).
When you switch on the TV the last channel you were watching before switching the TV off does not appear.	<ul style="list-style-type: none"> • This is not a malfunction. Press the number buttons on the remote control to select the desired channel.
Distorted picture when changing programmes or selecting teletext.	<ul style="list-style-type: none"> • Turn off any equipment connected to the Scart connector on the rear of the TV.
Wrong characters appear when viewing teletext.	<ul style="list-style-type: none"> • Use the menu system to enter the "Country" menu (see page 16) and select the country in which you operate the TV set. For cyrillic languages, we recommend selecting Russia country if your own country does not appear in the list.
Wrong characters appear when viewing NexTVView.	<ul style="list-style-type: none"> • Use the menu system to enter the "Language" menu (see page 16) and select the same language that NexTVView is broadcast in.
Picture slanted.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Rotation" option in the "Features" menu to correct the picture slant (see page 15).
Snowy picture when viewing a TV channel.	<ul style="list-style-type: none"> • Using the menu system, select the "Manual Programme Preset" menu and adjust Fine Tuning (AFT) to obtain better picture reception (see page 18). • Using the menu system, select the "Noise Reduction" option in the "Picture Adjustment" menu and select "Auto" to reduce the noise in the picture (see page 11).

continued...

Problem	Solution
No unscrambled picture whilst viewing an unscrambled channel with a decoder or a Set Top Box connected through the Scart connector  3/  3.	<ul style="list-style-type: none"> • Using the menu system, select the "Features" menu and set "AV3 Output" to "TV" (see page 15). • Check that the Decoder or the Set Top Box is not connected on the scart  2/  2.
 ,  ,  and  buttons do not work in PAP mode.	<ul style="list-style-type: none"> • PAP navigation is only possible in TV mode, please check that Media Selector is set to TV.
Remote control does not function.	<ul style="list-style-type: none"> • Check that the Media Selector on the remote control is set to the device you are using (VCR, TV, DVD or AUX). • If the remote control does not operate the VCR or DVD even when the Media Selector has been set correctly. Enter the necessary code set as explained on page 30. • Replace the batteries.
The standby indicator  on the TV flashes.	<ul style="list-style-type: none"> • Contact your nearest Sony service centre.

 If you continue to experience problems, have your TV serviced by qualified personnel. Never open the casing yourself.

SECTION 2 DISASSEMBLY

2-1. Rear Cover Removal

Remove the rear cover fixing screws indicated and pull the rear cover backwards away from the set. Take care when removing the rear cover not to damage the speaker cable [Disconnect the speaker connector] a speaker is fitted inside the rear cover.

2-2. Speaker Connector Disconnection

Before completely removing the rear cover disconnect the speaker connector which is located on the inside of the set.

2-3. Chassis Removal and Refitting

To remove lift the main bracket rear slightly and slide the chassis away from the beznet. Ensure that the interconnecting leads are released from their purse locks to prevent damage being caused.

When refitting the chassis ensure that the main bracket is located in the beznet guide slots before sliding the chassis forwards. Refit the inter-connecting leads in their respective purse locks.

2-4. Service Position

To place the chassis in the service position, insert the main bracket firmly into the T-slot located on the left corner of the beznet as indicated (see inset). To gain access to the underside of the boards follow the instructions on page 16. [Removal and Replacement of the main bracket bottom plates].

2-5. G Board Removal

To remove the G Board remove the two screws from the middle of the board, release the clips circled and ease the board gently away from the support bracket.

2-6. D2 Board Removal

To remove the D2 board remove the two screws circled, release the clips circled and ease the board gently away from the support bracket.

2-7. D Board Removal

To remove the D board first remove the D2 bracket by removing the two screws circled and releasing the four clips (two on each side of the bracket). The D board can then be removed using the same method as the G board but with the necessity to remove only one screw from the middle of the D board.

2-8. Picture Tube Removal

WARNING: BEFORE REMOVING THE ANODE CAP

High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT *before* attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.

1. Discharge the anode of the CRT and remove the anode cap.
 2. Unplug all interconnecting leads from the Deflection yoke, neck assy, degaussing coils and CRT grounding strap.
 3. Remove the C Board from the CRT.
 4. Remove the chassis assembly.
 5. Loosen the Neck assembly fixing screw and remove.
 6. Loosen the Deflection yoke fixing screw and remove.
 7. Place the set with the CRT face down on a cushion and remove the Degaussing Coil holders.
 8. Remove the Degaussing Coils.
 9. Remove the CRT grounding strap and spring tensioners.
 10. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT.
- [Take care not to handle the CRT by the neck.]

Removal of the Anode-Cap

REMOVAL PROCEDURE.

- ① Turn up one side of the rubber cap in the direction indicated by the arrow (a)
- ② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow (b)
- ③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling it up in the direction of the arrow (c)

How to handle the Anode-Cap

1. To prevent damaging the surface of the anode-cap do not use sharp materials.
2. Do not apply too great a pressure on the rubber, as this may cause damage to the anode connector.
3. A metal fitting called a shatter hook terminal is fitted inside the rubber cap.
4. Do not turn the rubber foot over excessively, this may cause damage if the shatter hook sticks out.

REMOVAL AND REPLACEMENT OF THE MAIN-BRACKET BOTTOM PLATES.

(1) REMOVING THE PLATES

In the event of servicing being required to the solder side of the printed wiring boards, the bottom plates fitted to the main chassis bracket require to be removed. This is performed by cutting the gates with a sharp wire cutter at the locations indicated by the arrows.

Note : There are 2 plates fitted to the main bracket. Only remove the necessary plate to gain access to the printed wiring board.

For safety reasons, on no account should the plates be removed and not refitted after servicing.

(2) REFITTING THE PLATES

Because the plates differ in size it is important that the correct plates are refitted in their original location.

Please note that the plates need to be rotated 180 degrees from their cut position to allow the tabs to be fitted into their catch positions.

SECTION 3 SET-UP ADJUSTMENTS

- When complete readjustment is necessary or a new picture tube is installed, carry out the following adjustments.
- Unless there are specific instructions to the contrary, carry out these adjustments with the rated power supply.
- Unless there are specific instructions to the contrary, set the controls and switches to the following settings :

Contrast normal

Brightness normal

Carry out the adjustments in the following order :

- 3-1. Beam Landing.
- 3-2. Convergence.
- 3-3. Focus.
- 3-4. White Balance.

Note : Test equipment required.

1. Color bar/pattern generator.
2. Degausser.
3. Oscilloscope.
4. Digital multimeter.

3-1. Beam Landing

Preparation :

- In order to reduce the influence of geomagnetism on the set's picture tube, face it in an easterly or westerly direction.
- Switch on the TV set's power and degauss with a degausser.

(I) Adjustment of Correction Magnet for Y-Splitting Axis.

- Input a crosshatch signal from the pattern generator.
- Set the Picture control to minimum and confirm that the Brightness control is set to normal.
- Position the neck assembly as indicated in Fig.3-2.
- Loosen the deflection yoke fixing screw.
- Move the deflection yoke as far forward as is possible.
- Adjust the upper and lower pin symmetrically by opening or closing the Y-splitting axis correction magnets located on the neck assembly. [See Fig 3-3]
- Return the deflection yoke to its original position and re-tighten its fixing screw.

Fig.3-1

Y-splitting axis correction magnet

Caution :

High voltages are present on the Deflection yoke terminals - take care when handling the Deflection yoke whilst carrying out adjustments.

(2) Landing

Note : Before carrying out the following adjustments adjust the magnets as indicated [See Fig.3-4].

- Input a crosshatch signal from the signal generator.
- Rough-adjust the focus and horizontal convergence.
- Switch from the crosshatch pattern to an all-red pattern.
- Move the deflection yoke backwards and adjust with the purity magnet so that the red is at the centre and it aligns symmetrically [See Fig.3-5].
- Move the deflection yoke forward to the point where the entire screen just becomes red [Mark its position].
- Move the deflection yoke further forward until the screen just changes colour at the edges. [Mark its position]
- Position the deflection yoke between the two marks indicated above.
- Input a crosshatch pattern from the pattern generator and rotate the deflection yoke so that the horizontal lines are parallel with the top and bottom of the screen.
- When the position of the deflection yoke has been determined, fasten it with its fixing screw.
- Switch the pattern generator to green then blue and confirm the purity.
- If the beam does not land correctly in all the corners of the screen, use disk magnets to correct it. [Confirm the corner landing for green and blue]

Fig.3-2

Fig.3-3

Fig.3-4

3-2. Convergence

(1) Screen centre convergence [Static convergence]

- Input a dot pattern signal from the pattern generator.
- Normalize the picture setting.
- [Moving vertically], adjust the V.STAT magnet so that the vertical red, green and blue dots coincide at the centre of the screen.

Fig.3-5

By opening or closing the V.STAT magnet, the red green and blue dots move in the direction indicated below.

Note: Do not adjust the H-STAT by rotating the V.STAT magnets as this can affect the focus setting.

- Correction for HMC [Horizontal mis-convergence] and VMC [Vertical mis-convergence] by using the BMC [Hexapole] magnet.

- HMC correction by BMC [Hexapole] magnet and movement of the electron beam.

HMC correction(A)

HMC correction(B)

- VMC correction by BMC [Hexapole] magnet and movement of the electron beam.

VMC correction(A)

VMC correction(B)

HAMP Adjustment

Adjust the HAMP using HAMPL and HAMPR registers in the Dynamic Convergence section of the service menu.

HTIL Adjustment

HTIL correction can be performed by adding a THL correction assembly to the Deflection yoke.

YCH Adjustment

TLV Adjustment

H-TRAP Adjustment

The H-TRAP should not be adjusted unless absolutely necessary as it affects the TLV settings.

Layout of each control

Note : If you are unable to adjust the corner convergence properly, this can be corrected with the use of permalloy magnets.

3-3. Focus Adjustment

- Receive a television broadcast signal.
- Normalize the picture setting.
- Adjust the focus control located on the flyback transformer to obtain the best focus at the centre of the screen.
Bring only the centre area of the screen into focus, the magenta-tinge appears on the screen. In this case, adjust the focus to optimize the screen uniformly.

3-4. Screen (G2), White Balance

[Adjustment in the service mode using the remote commander]

G2 adjustment

- Input a dot signal from the pattern generator.
- Set the Picture, Brightness and Colour to minimum.
- Apply 175V DC from an external power supply to the R, G and B cathodes of the CRT.
- Whilst watching the picture, adjust the G2 control [SCREEN] located on the flyback transformer to the point just before the flyback return lines disappear.

White balance adjustment for TV mode

- Input an all-white signal from the pattern generator.
- Program the Remote Commander for operation in Service Mode. [See Page 21].
- Enter into the 'Service Mode' by pressing 'AUX/VIDEO' button twice and 'MENU' on the Service Commander.
- Select 'Service' from the on screen menu display and press 'Right Arrow'.
- The 'Service' menu will appear on the screen.[See Page 21]
- Select 'Picture' from the on screen menu and press right arrow.
- Select 'Picture settings' from the on screen menu and press right arrow and set the 'Contrast_Max' to MAX.
- Select 'White Balance' from the on screen menu and press right arrow.
- The 'White Balance' menu will appear on the screen.
- Set the 'Normal_PAL_RD' to 465.
- Adjust the 'Normal_PAL_GD' and the 'Normal_PAL_BD' so that the white balance becomes optimum.
- Select 'Picture settings' from the on screen menu and press right arrow and set the 'Contrast_Min' to MIN.
- Set the 'Normal_PAL_RC' to 121.
- Adjust the 'Normal_PAL_GC' and the 'Normal_PAL_BC' with the left and right buttons on the commander so that the white balance becomes optimum.
- Press the 'OK' button to write the data for each item.

SECTION 4 CIRCUIT ADJUSTMENTS

4-1. Electrical Adjustments

Service adjustments to this model can be performed using the supplied remote Commander RM-942.

Programming the Remote Commander for Operation in Service Mode

- Press and hold the left Mode Select button until the VCR and DVD LED's flash.
- Press 99999. The TV LED should light. The remote commander is now set to Service Mode.
- To return the remote commander to normal operation mode repeat step 1. then press 00000. The TV LED should light. The remote commander is now set to normal mode.

Setting the TV into Service Mode

- Program the remote commander for operation in Service Mode as described above.
- Turn on the TV main power switch.
- Press the 'aux/video' standby button on the remote commander twice. 'TT___' will appear in the upper right corner of the screen. Other status information will also be displayed.
- Press 'MENU' on the remote commander to obtain the following menu on the screen.

Service Main Menu: AE6BA'Y (v0.26D) NVM VERSION: 04H	
Service	▶
Design	
Error	
Select: ▲ ▼	Select Item: ▶ Previous Menu: ◀
FACTORY INFO: FFH FFH 03H	

- Move to the corresponding adjustment item using the up or down arrow buttons on the Remote Commander.
- Press the right arrow button to enter into the required menu item.
- Press the 'aux/video' button on the Remote Commander to quit the Service Mode when all adjustments have been completed.

Note :

- After carrying out the service adjustments, to prevent the customer accessing the 'Service Menu' switch the TV set OFF and then ON.

Sub Brightness Adjustment

- Input a Monoscope pattern.
- Program the Remote Commander for operation in Service Mode. [See Page 21].
- Press 'AUX/VIDEO' 'AUX/VIDEO' 13 on the Remote Commander.
- Adjust the 'Sub-Brightness' data so that there is barely a difference between the 0 IRE and 10 IRE signal levels.

Sub Contrast Adjustment

- Input a video signal that contains a small 100% white area on a black background.
- Connect an oscilloscope to Pin 10 of J7330 [C Board].
- Program the Remote Commander for operation in Service Mode. [See Page 21].
- Adjust the Sub-Contrast [Using 'AUX/VIDEO' 'AUX/VIDEO' '11'] to obtain a voltage of 114 +/- 5V.

Sub Colour Adjustment

1. Receive a PAL colour bar signal.
2. Connect an oscilloscope to Pin 5 of CN7331 [C Board].
3. Program the Remote Commander for operation in Service Mode. [See Page 21].
4. Adjust the 'Sub Colour' [Using 'AUX/VIDEO' 'AUX/VIDEO' '12'] so that the Cyan, Magenta and Blue colour bars are of equal levels as indicated below.

Deflection System Adjustment

1. Program the Remote Commander for operation in Service Mode. [See Page 21] and enter into the 'Geometry' service menu, Wide mode adjustment.
2. Select and adjust each item in order to obtain the optimum image.

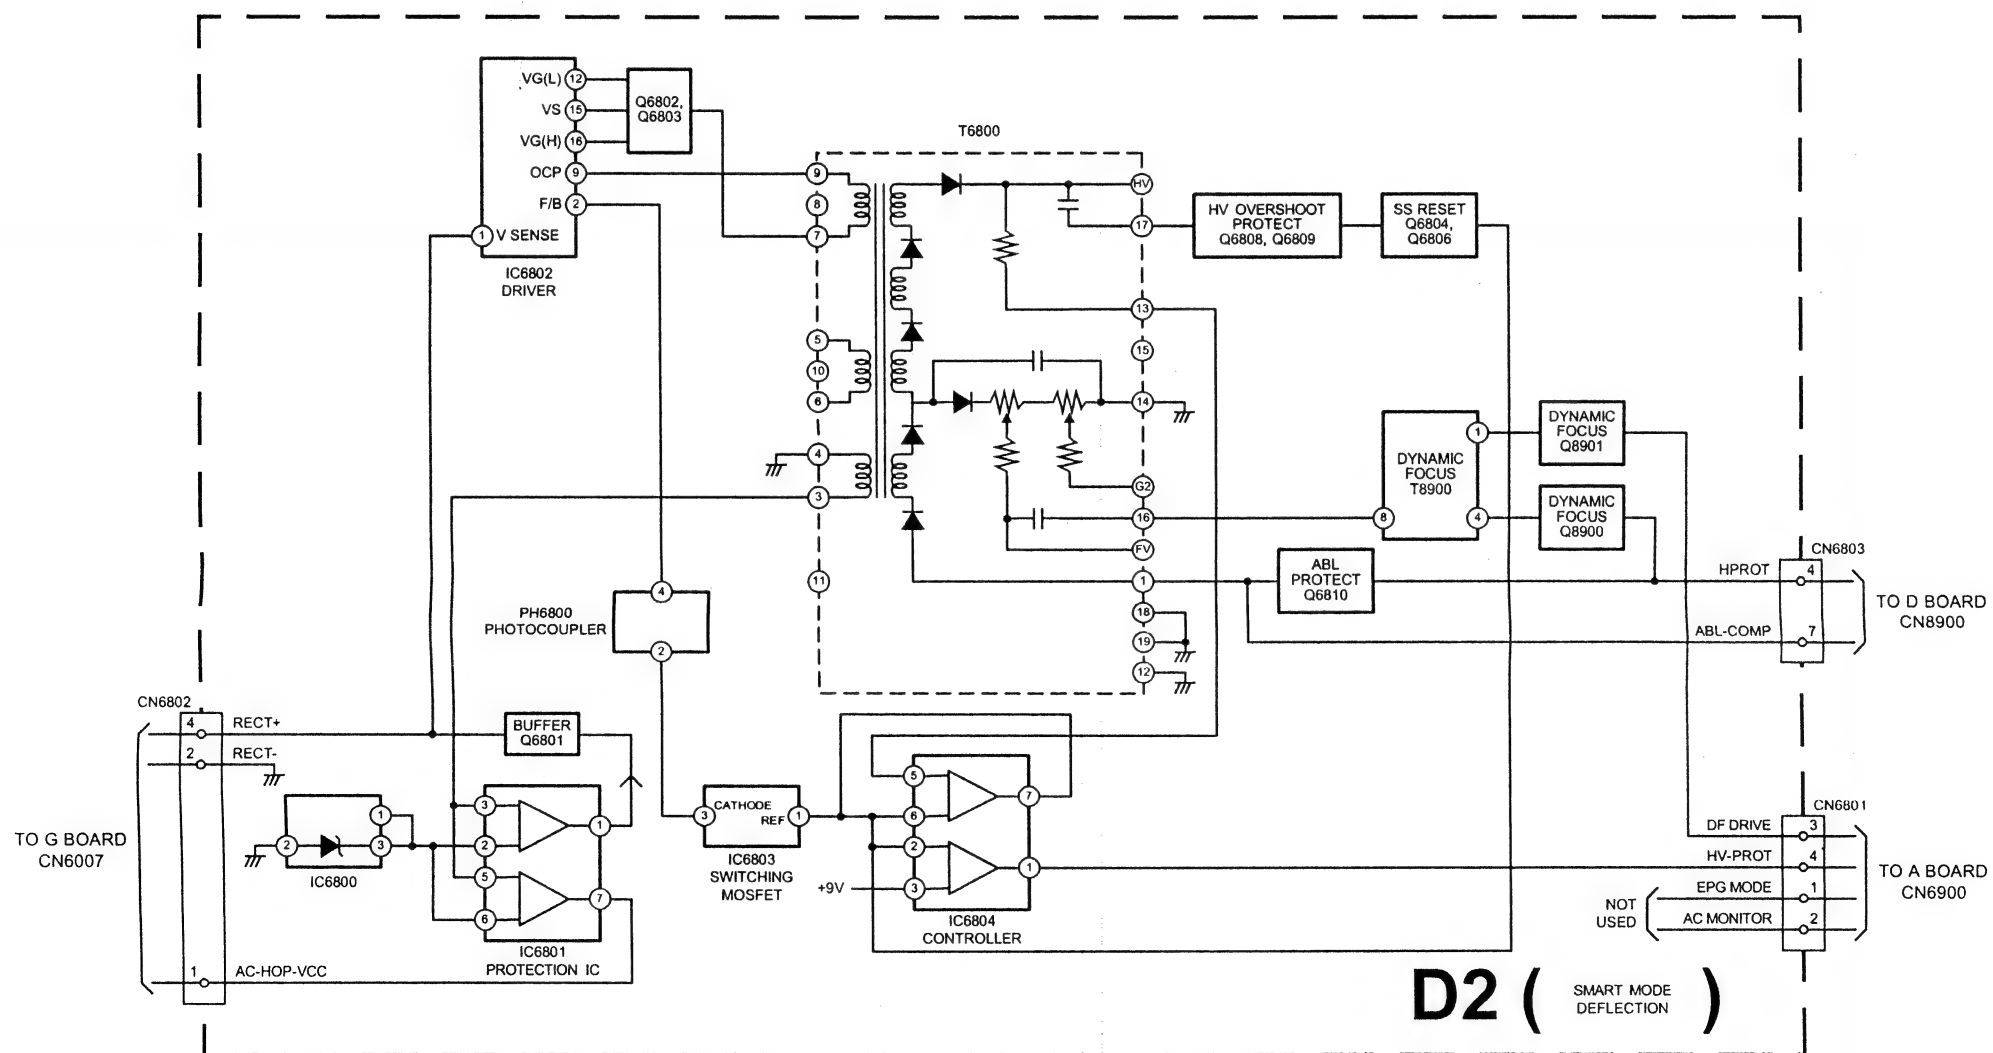

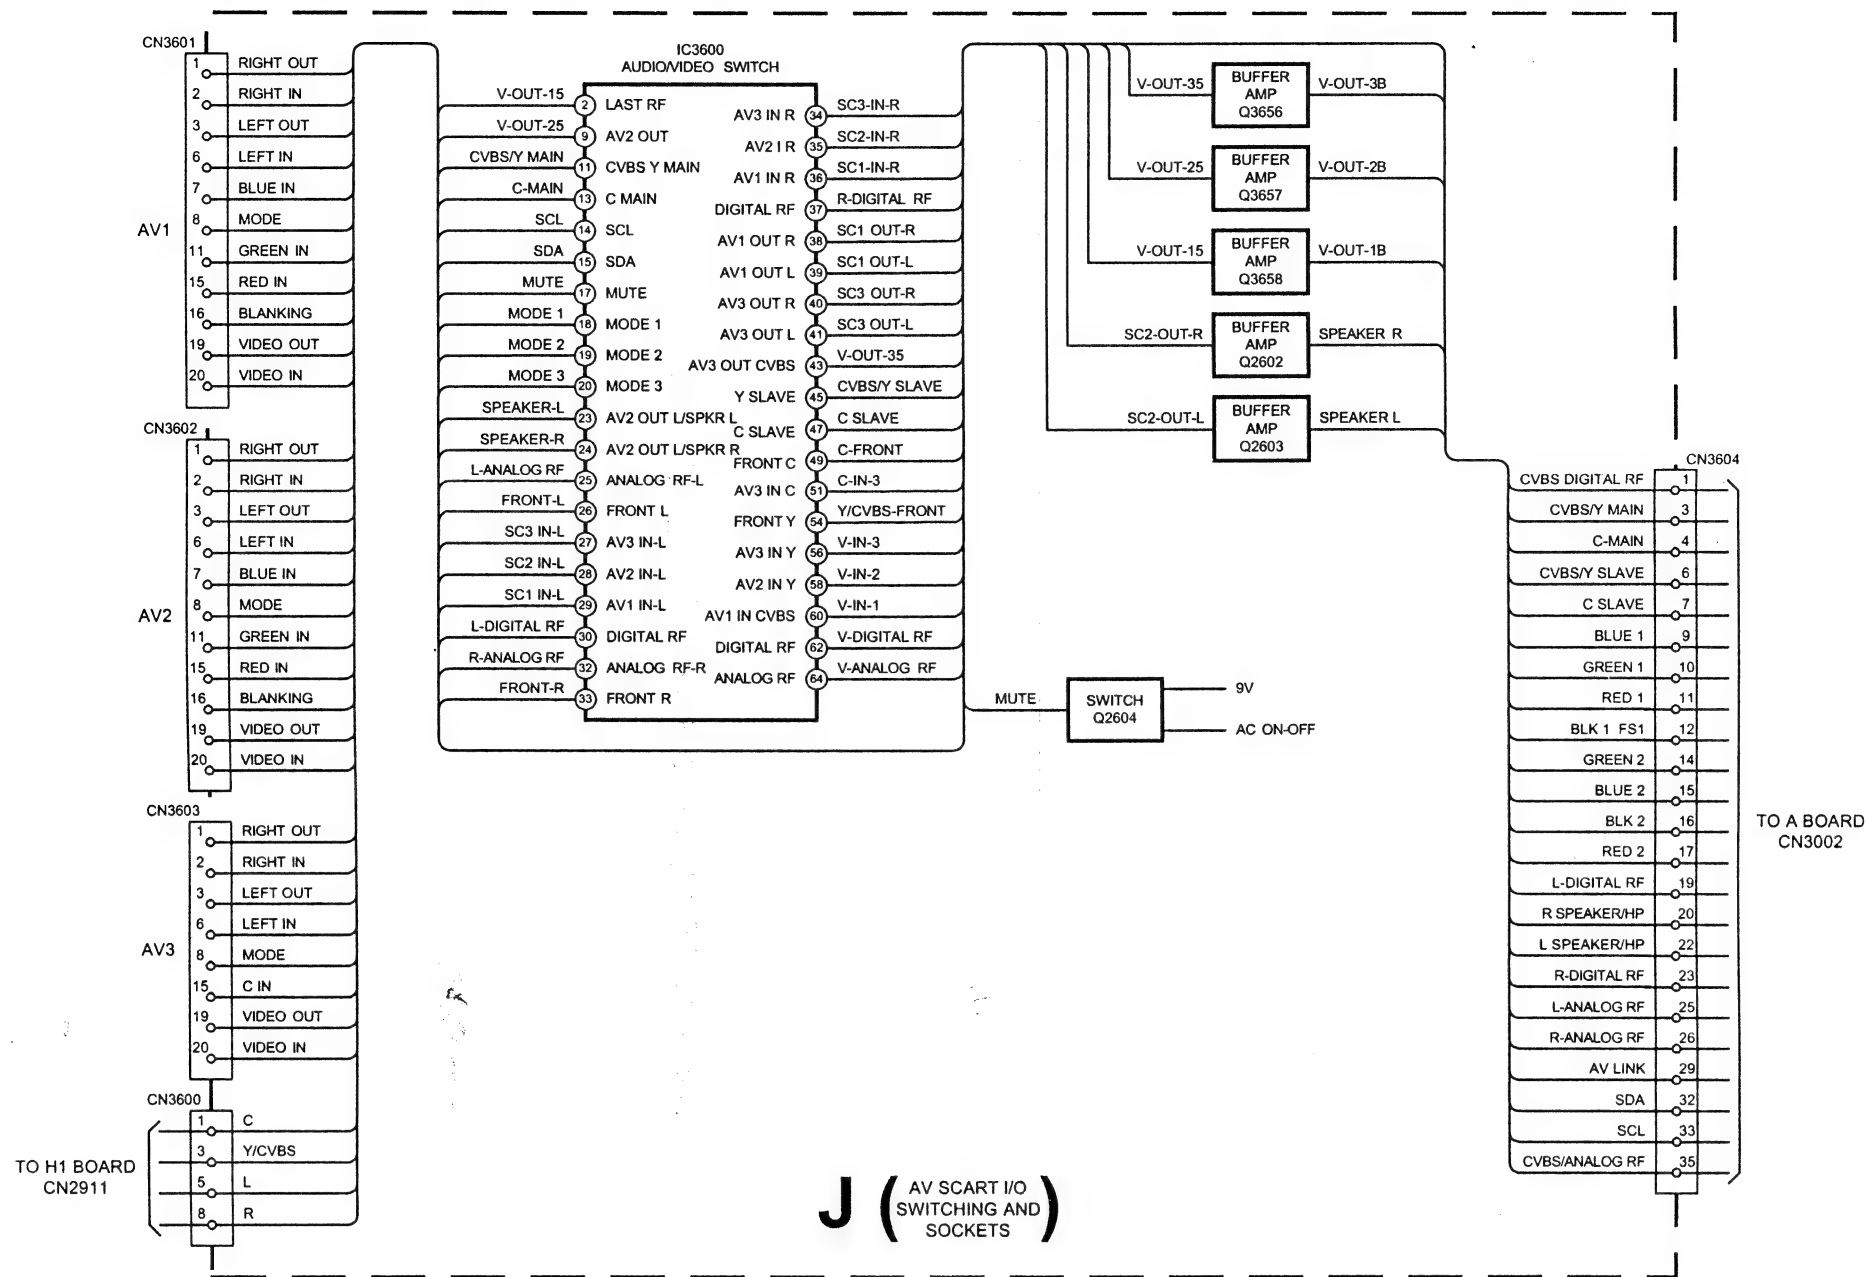

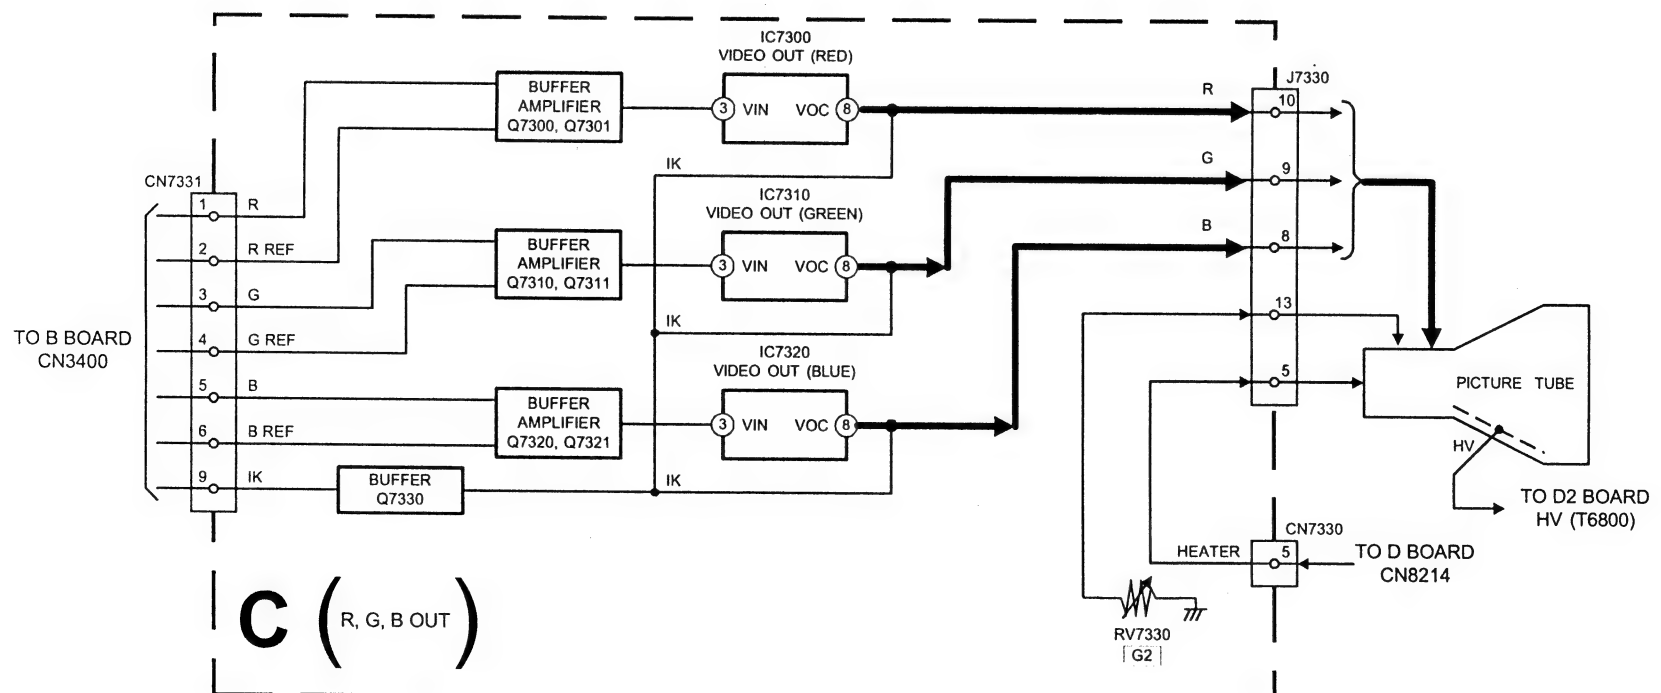

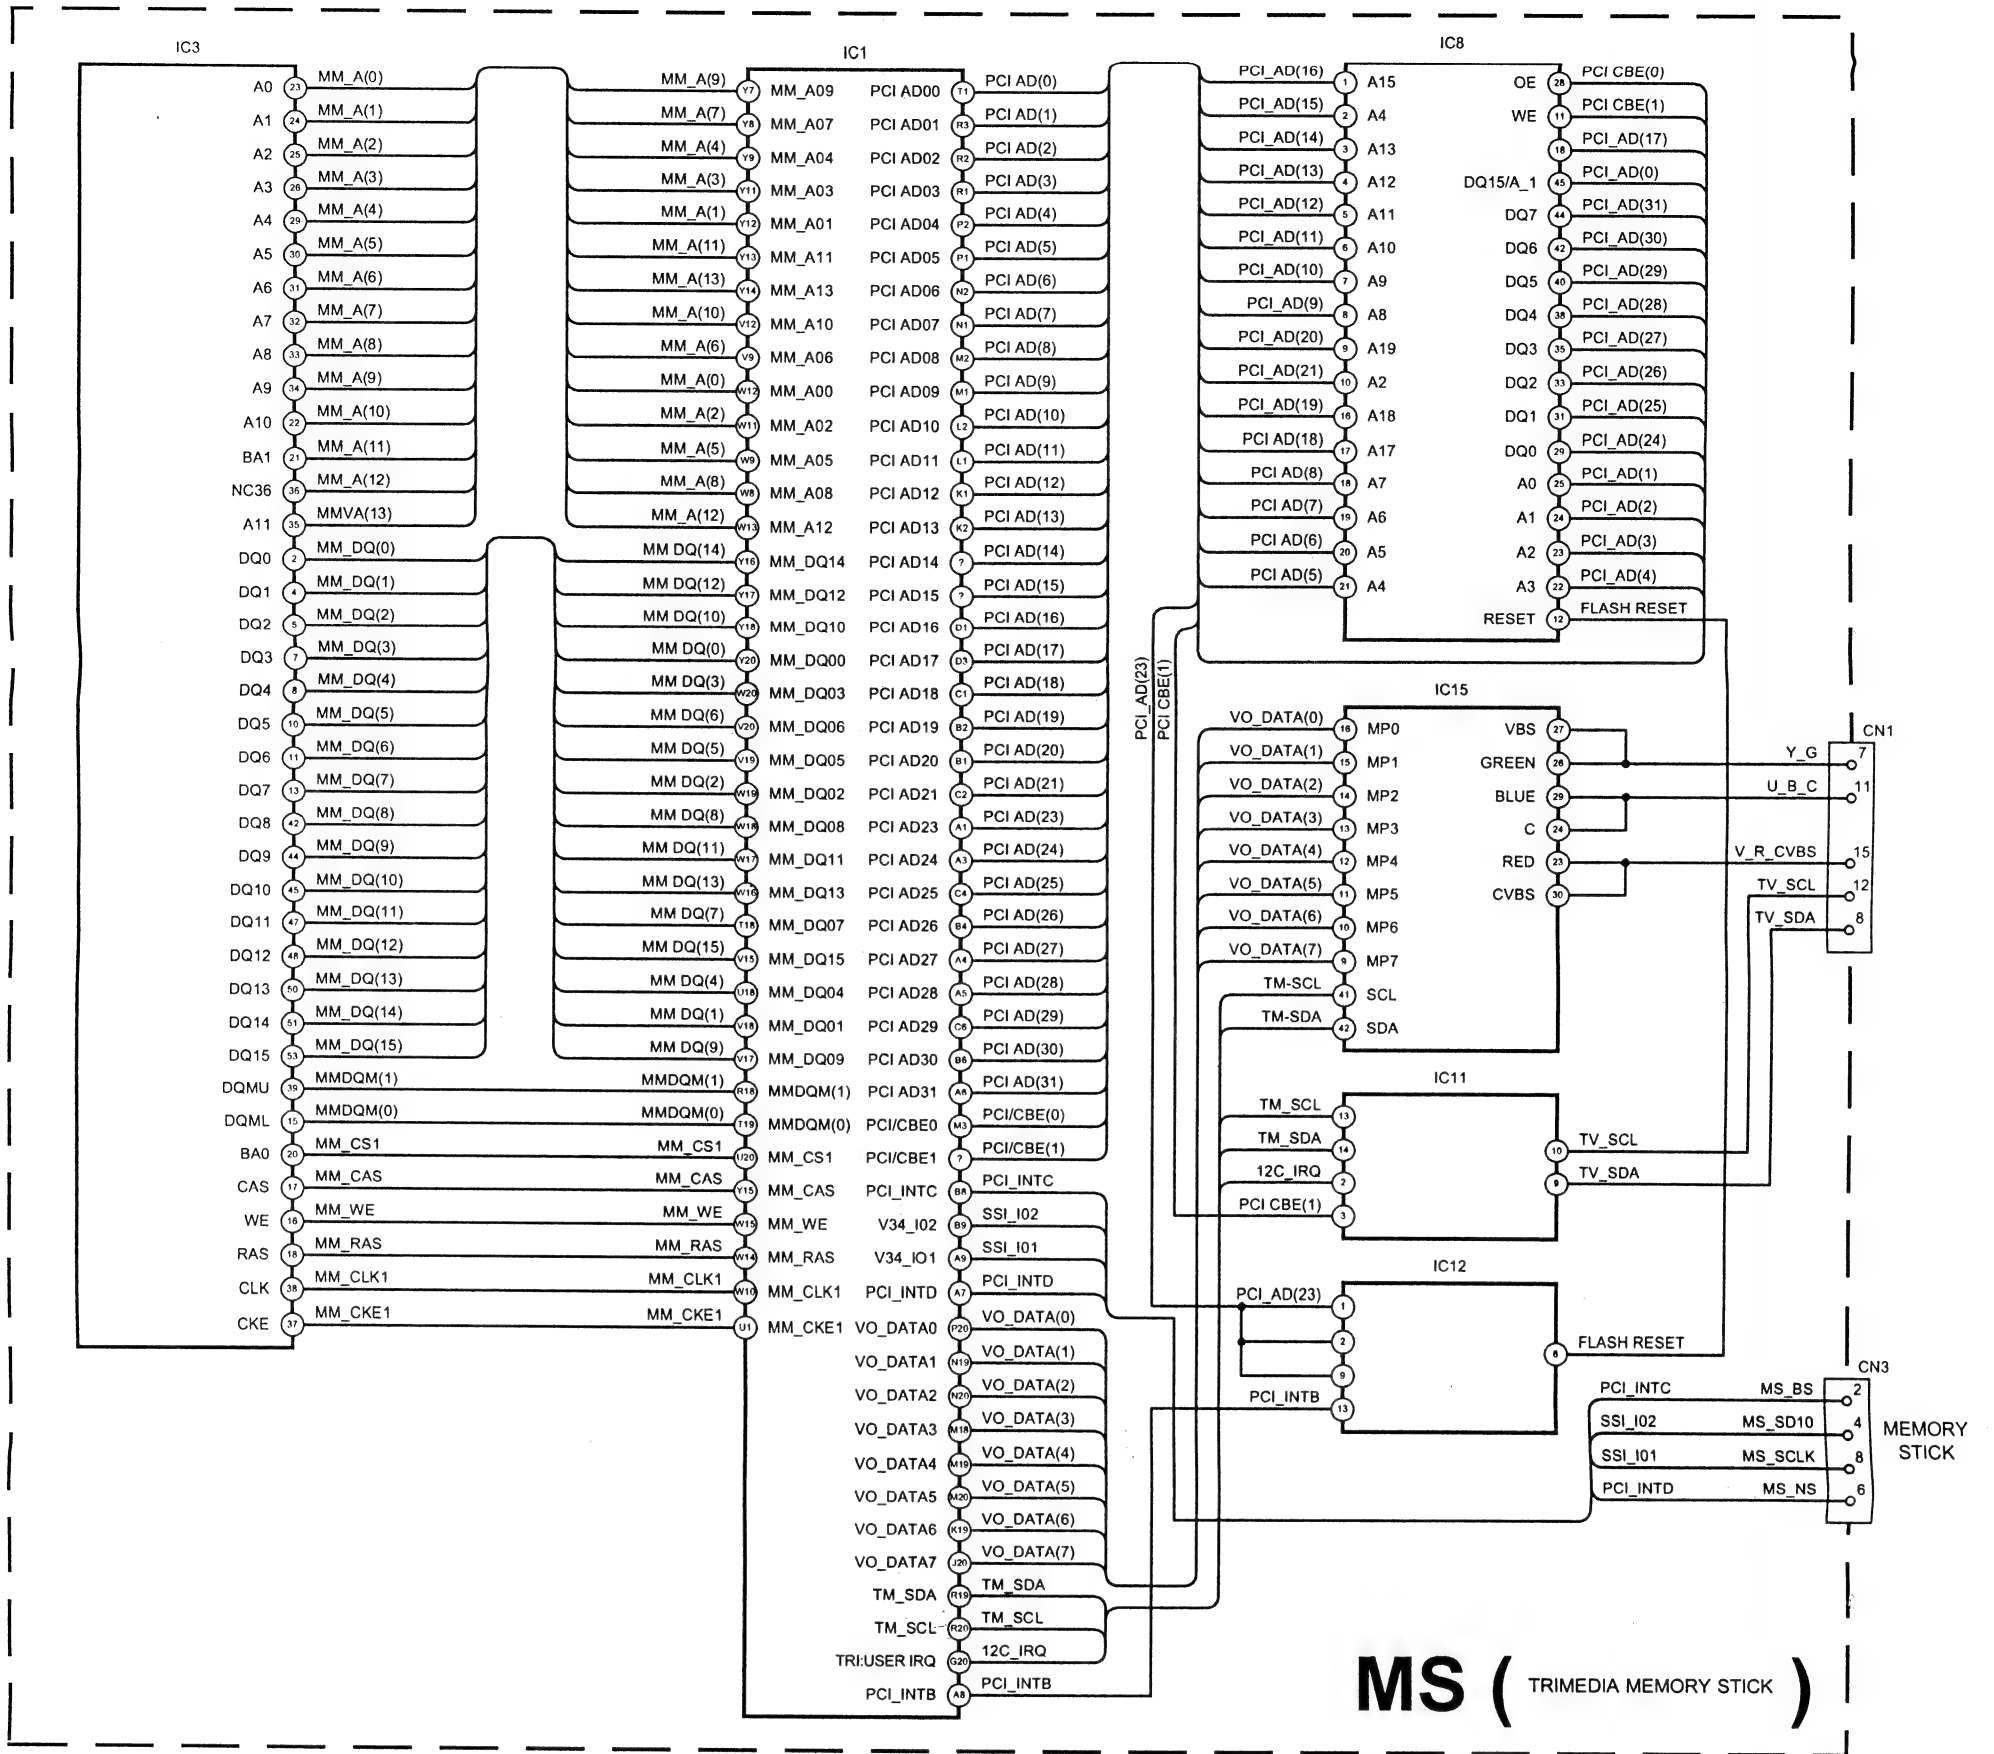

4-2. TEST MODE 2:

Test Mode 2 is available by programming the Remote Commander for operation in Service Mode [As shown on Page 21] then pressing the 'AUX/VIDEO' button twice, OSD 'TT' appears. The functions described below are available by selecting the two numbers. To release 'Test mode 2', press 00, or switch the TV set into Stand-by mode.

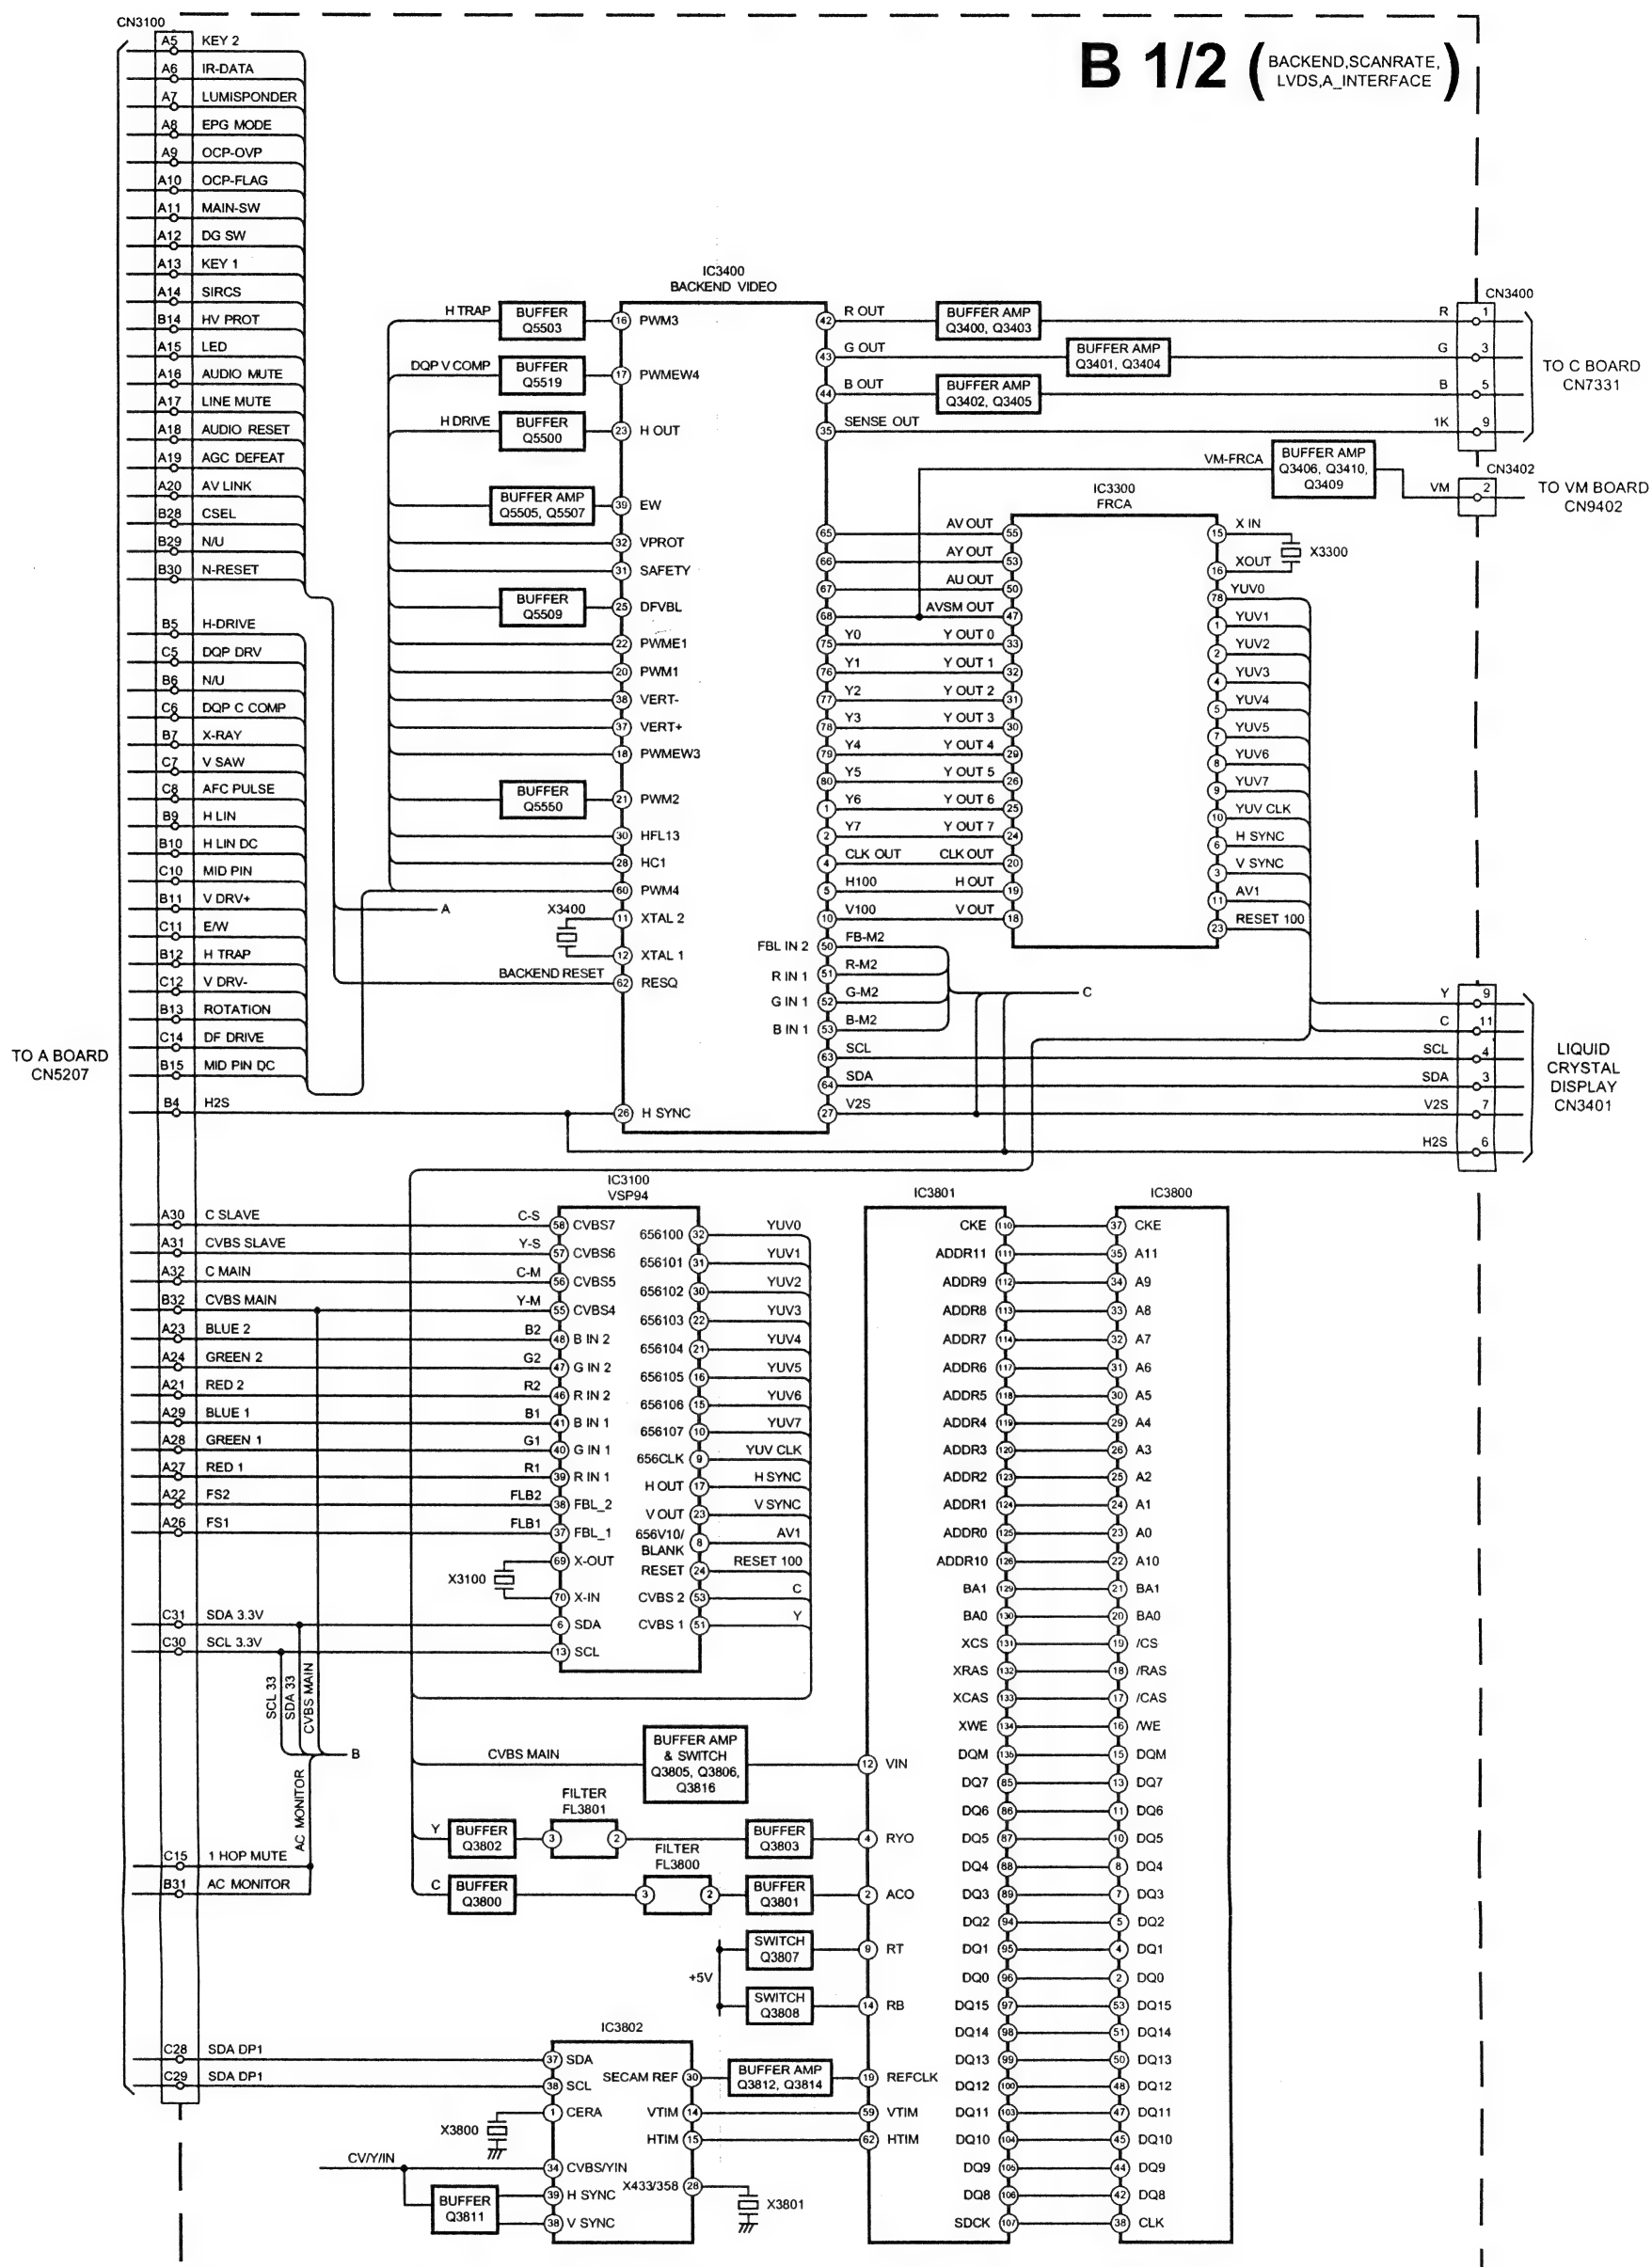

00	'TT' mode off
01	Set picture level to maximum
02	Set picture level to minimum

Note :

- All capacitors are in μF unless otherwise noted.
- $\text{pF} : \mu\text{F}$ 50WV or less are not indicated except for electrolytic types.
- Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch : 5mm
Electrical power rating : 1/4W

- Chip resistors are 1/10W
- All resistors are in ohms.
k = 1000 ohms, M = 1000,000 ohms

-  : nonflammable resistor.
-  : fusible resistor.
-  : internal component.
-  : panel designation or adjustment for repair.

- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- All voltages are in Volts.
- Readings are taken with a 10Mohm digital multimeter.
- Readings are taken with a color bar input signal.
- Voltage variations may be noted due to normal production tolerances.

-  : B + bus.
-  : B - bus.
-  : RF signal path.
-  : earth - ground.
-  : earth - chassis.

SECTION 6 EXPLODED VIEWS

NOTE :

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remarks column.

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

Note : Les composants identifiés par une trame et par une marque Δ sont d'une importance critique pour la sécurité. Ne les remplacer que par des pièces du numéro spécifié.

Note : The components identified by shading and marked Δ are critical for safety. Replace only with the part numbers specified in the parts list.

MS BOARD COMPLETE Parts List :	82
VM BOARD COMPLETE Parts List :	85
MISCELLANEOUS :	86
ACCESSORIES AND PACKAGING MATERIALS :	86
REMOTE COMMANDER :	86

Note : Refer to the designated variant parts list when seeking a part indicated by an asterisk (*)
Parts indicated (XX) on the Schematic Diagram are not used in this model and therefore do not appear in the Parts List.

Note : The components identified by shading and marked Δ are critical for safety. Replace only with the part numbers specified in the parts list.

TRACE

A new TV Repair Assistance Tool that combines ease of use and powerful PC software tools to allow you to save valuable time during many TV repairs.

The TRACE interface connects to the PC's serial port. It provides connection to the TV's I²C bus and can be provided with an InfraRed transmitter (optional).

The interface is powered by a standard 9 V PP3 battery for portable use, and can also be powered by an external 9V/25mA DC power supply.

The TRACE software that is supplied with the interface allows you to:

- Read, restore and compare NVM contents via the I²C bus
- Acknowledge check of all I²C devices in the TV set
- Read Error Codes (emulation of the Error Reader tool)

With the optional IR Add-on kit, the following features can be added:

- Remote Commander emulation
- User programmable Functional Check through Infrared
- Fast and documented Test Mode setting of all Sony TV chassis

Additional features such as Adjustments and Troubleshooting are available in chassis-dependent software modules. Please contact your local Sony Service organisation for the latest information.

Note: For workshops already using the existing I²C Link parallel port interface (9-948-320-30), this software can be used as well, replacing the TV Data Handling software (9-948-340-50), but Error Reader and IR functions can only be accessed with the TRACE interface.

Partnumbers:	TRACE Starter Kit (TRACE interface + software):	9-948-320-70
	TRACE Software (for users of the I ² C Link interface):	9-948-340-80
	TRACE IR Add-on (IR interface + Remote Commander software):	9-948-320-80

PC requirements: IBM-compatible PC with operating system Windows95, Windows98, or WindowsNT*.

* WindowsNT only supported with TRACE interface
